

FOR IMMEDIATE RELEASE

IXIO LEGAL QSHIFT SAVES CORPORATE LEGAL DEPARTMENTS TIME AND MONEY

SEATTLE, WA – July 21, 2009 – Ixio Legal QShift (www.ixio.com) saves corporate legal departments time and money by automating the document drafting process. Lynn Herrick, General Counsel of ProfitLine, the leading provider of outsourced telecom expense management and managed mobility services, is using QShift to help them create her legal agreements. Before using QShift, “It was challenging to remember what was in the last version of the document and if I made the same changes consistently in several documents” says Lynn. Since implementing QShift, ProfitLine’s legal department has been able to produce documents quicker and with more consistency, ensuring that they are making the same promises to each customer. “QShift enables me to produce accurate, consistent documents in a fraction of the time that it took to create legal documents in the past,” says Lynn.

Ixio Legal QShift, a division of EVDense Corporation (www.evdense.com), is a smart document drafting solution that has been serving the legal community since 2004. QShift helps lawyers to save time and money by automating the creation of legal contracts and allowing 24/7 access to contract templates via an internet connection, as well as minimizing the risks and keeping a contemporaneous record of every document being drafted. By using QShift you can:

- Draft in minutes not hours
- Reduce your risk by creating 100 % meta data-free contracts
- Infuse your knowledge by attaching comments to clauses, draft or templates
- Store and access any clause quickly
- Make language updates to your all of your templates in one place at one time
- Standardize and create professional looking contracts

About ProfitLine

ProfitLine (www.profitline.com), based in San Diego, CA and founded in 1992, is the leading provider of outsourced telecom expense management solutions for large enterprises and government agencies. ProfitLine's seasoned telecom experts combine deep domain expertise and Six Sigma principles with intelligent technology to deliver clients substantial savings, operational efficiencies and enhanced visibility to mission critical telecom assets.
